System Requirements for Diet Planning and Health Checkup System

1. A guest user can browse the system overview about health care packages and services.
2. A guest user can request an inquiry about diet plans and health care packagers.
3. A guest user can register as a member on the website.
4. To become a member, they must register with the system by providing details such as Name, Address, NIC, Email, contact.
5. A member can login to the website using a username and a password.
6. A registered member can view their profile, delete profile, or edit profile details.
7. A Member is required to provide their personal medical information to request a diet plan.
8. Members can request appointments for a health checkup.
9. Members can make their payments through the websites using credit cards, online money transfer or EFT.
10. After the payment member will receive the requested service or the diet plan by email.
11. Admins need to login to the website in order to resume their activities.
12. Admins are in charge of viewing the medical records of the members.
13. Admins are able to view the requests for diet plans and health care packages.
14. Admins are in charge of suggesting diet plans for the customer according to the given medical information.
15. After a member request for an appointment, admin checks available date slots and send an email to the member through the system.

Noun & Verb Analysis

- Nouns in Red color
- Verbs in Blue color

1. A guest user can browse the system overview about health care packages and services.
2. A guest user can request an inquiry about diet plans and health care packagers.
3. A guest user can register as a member on the website.
4. To become a member, they must register with the system by providing details such as Name, Address, NIC, Email, contact.
5. A member can login to the website using a username and a password.
6. A registered member can view their profile, delete profile, or edit profile details.
7. A Member is required to provide their personal medical information to request a diet plan.
8. Members can request appointments for a health checkup.
9. Members can make their payments through the websites using credit cards, online money transfer or EFT.
10. After the payment member will receive the requested service or the diet plan by email.
11. Admins need to login to the website in order to resume their activities.

Individual Contributions

IT21306372 - B.M.I.R.B. Basnayake

- Created and documented a part of user requirements and noun verb analysis.
- Created the CRC card for member class.
- Created the class diagram for member class.
- Created the classes and coded the member class.

IT21295010 – M.K.Y.S. Yapa

- Created and documented a part of user requirements and noun verb analysis
- Created the CRC card for admin class.
- Created the class diagram for admin class.
- Created the classes and coded the admin class.
- Created the final pdf document

IT21361890 – M.N.AMMAAR

- Created the CRC card for guest user class and health checkup class.
- Created the class diagram for guest user class and health checkup class.
- Created the classes and coded the guest user class and health checkup class.

IT21210860 - D.L.B.S Liyanaarachchi

- Created and documented a part of user requirements.
- Created the CRC card for appointment class and payment class.
- Created the class diagram for appointment class and payment class.
- Created the classes and coded the appointment class and payment class.

IT21157714 - N.M.R.J.K Nishshanka

- Created the CRC card for diet plans class and medical information class.
- Created the class diagram for diet plans class and medical information class.
- Created the classes and coded the diet plans class and medical information class.
